Clean Spaces. Healthy Lives. Pest Free Tomorrow.

THE 4D CONCEPT OF PROFESSIONAL PEST MANAGEMENT

PROTECTING HEALTH
PROTECTING PROPERTY
PROTECTING REPUTATION

A SMARTER APPROACH. A SAFER ENVIRONMENT.

The 4D Concept is a proven framework for effective, sustainable and long-term pest control. It focuses on prevention, control and continuous improvement.

1

D
DETECT

DETECT – Identify Pest Activity Early

- ✓ Thorough inspection of premises
- ✓ Monitor pest activity using tools & traps
- ✓ Identify pest species, entry points & breeding areas
- ✓ Assess risk and determine control strategy

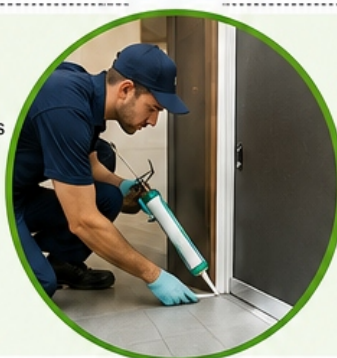

Early detection helps prevent pest problems before they become serious, reducing risks to health, products and property.

2

D
DENY

DENY – Eliminate Pest Access & Resources

- ✓ Seal cracks, gaps and entry points
- ✓ Maintain good sanitation and hygiene
- ✓ Proper waste management
- ✓ Remove food, water and shelter sources
- ✓ Habitat modification

By denying pests access to food, water and shelter, we make the environment unfavorable for their survival and reproduction.

3

D
DESTROY

DESTROY – Control and Eliminate Pests

- ✓ Use targeted and effective treatment methods
- ✓ Safe & approved pest control products
- ✓ Baiting, trapping, spraying and restriction methods
- ✓ Adopt Integrated Pest Management (IPM)

Professional treatments safely reduce or eliminate existing pest populations while minimizing impact on people and the environment.

4

D
DOCUMENT

DOCUMENT – Record, Review & Improve

- ✓ Maintain detailed service records & reports
- ✓ Track pest activity and treatment history
- ✓ Trend analysis and corrective actions
- ✓ Support compliance, audits and certifications

Documentation ensures accountability, verifies results, supports legal compliance and helps continuously improve pest management programs.

4D = DETECT • DENY • DESTROY • DOCUMENT

Protects Health

ENVIRONMENT.**

PEST CONTROL IS FOOD SAFETY

A REGULATORY REQUIREMENT,
A BUSINESS NECESSITY.

As per FSSAI Regulations, 2011, all Food Business Operators (FBOs) must ensure that food is protected from contamination, adulteration and infestation by pests at all stages of food handling and manufacturing.

PROTECT
YOUR FOOD
PROTECT
YOUR BRAND

WHAT FSSAI SAYS?

Schedule 4 – Good Manufacturing and Hygiene Practices, Part II – Conditions of License / Registration

Clause 13: "Premises shall be free from infestation. Adequate provisions shall be made to prevent entry of pests & pests harborage. The premises shall be kept clean & well maintained."

WHY PEST CONTROL IS ESSENTIAL

Prevents contamination of food by pests, their droppings, hair & body parts.

Ensures compliance with FSSAI regulations and avoids legal action, penalties or license suspension.

Protects brand reputation and customer trust.

Prevents damage to raw materials, packaging, equipment & infrastructure.

Ensures smooth audits and hassle-free inspections.

COMMON PESTS IN FOOD PREMISES

Rodents

Carry bacteria, contaminate food & damage infrastructure.

Cockroaches

Spread pathogens & trigger allergic reactions.

Flies

Transmit diseases & contaminate food surfaces.

Ants

Contaminate food & packaging materials.

OUR PEST CONTROL SERVICE INCLUDES

Compliance

**BE FSSAI COMPLIANT.
BE PEST FREE.
BE TRUSTED.**

Partner with a professional pest control service provider and ensure a safe, hygienic & compliant food facility.

PEST FREE PREMISES. SAFE FOOD. STRONGER INDIA.

A Small Step Today,
A Safer Tomorrow.

PEST CONTROL IS NOT OPTIONAL, IT'S A REQUIREMENT!

ESSENTIAL FOR QMS & ISO AUDITS IN
ALL FOOD INDUSTRIES IN INDIA

Pest contamination can destroy your product quality, brand reputation and compliance status.

Effective Pest Control is a Critical Control Point that ensures Food Safety, Hygiene and Regulatory Compliance.

WHY PEST CONTROL IS ESSENTIAL?

PREVENTS CONTAMINATION

Pests can carry pathogens, contaminate raw materials and finished products.

ENSURES FOOD SAFETY

Protects consumer health and ensures safe, hygienic food products.

ENSURES REGULATORY COMPLIANCE

Mandatory requirement under FSSAI, QMS & ISO Standards.

PROTECTS BRAND REPUTATION

Pest incidents can lead to customer complaints, product recalls and loss of trust.

ESSENTIAL FOR AUDIT APPROVAL

Effective pest control is checked during QMS & ISO audits.

WHAT AUDITORS LOOK FOR?

- ✓ Pest Control Policy & Procedure
- ✓ Approved Pest Control Vendor
- ✓ Site Map & Pest Risk Analysis
- ✓ Pest Monitoring Records
- ✓ Service Reports & Corrective Actions
- ✓ Use of Safe & Approved Chemicals
- ✓ Trained & Certified Pest Control Staff
- ✓ Evidence of Effectiveness

AUDIT
